Background of the Invention

Traditional pantie suffer from the disadvantage that, when it is being used during female period with sanitary napkin, problems of fluid leakage and removal of sanitary napkin inside the pantie are often exist. Moreover, it is inconvenience for female to change her fluid polluted pantie when she was out, as she has to takeoff her shoes then to takeoff the pantie through her legs. The fluid polluted pantie often soiled the clothes while changing the pantie.

Brief Summary of the Invention

This invention provides a pantie including the absorbent material is being sewn onto the two curve edges inside the pantie to prevent fluid leakage. In addition, there are four straps **Or** four Velcro on the both sides of pantie for easy removal instead of through the legs thus prevent soiling while changing.

The first object of this invention is to provide a sanitary pantie for female during period that prevents fluid leakage. The second object is to provide a sanitary pantie for female during period that keeps the sanitary napkin in place inside the pantie. The last object is to provide a sanitary pantie for female during period that prevents soiling the clothes while changing the pantie.

Brief Description of the Several Views of the Drawing

FIGURE 1 shows the outer view of the whole pantie that its removal device is straps; FIGURE 2 shows the inner view of the whole pantie that its removal device is straps; FIGURE 3 shows the outer view of the whole pantie that its removal device is Velcro; FIGURE 4 shows the inner view of the whole pantie that its removal device is Velcro.

As shown in Figure 1 and Figure 3, the pantie is comprised of anterior part 1 and posterior part 2. There are removal device located at the waist 3, 4, 5, 6. The removal device can be straps 7, 8, 9, 10 as shown in Figure 1 **Or** Velcro 13, 14, 15, 16 as shown in Figure 3.

As shown in Figure 2 and Figure 4, the absorbent material is being sewn onto the two curve edges 11, 12 inside the pantie to prevent fluid leakage and removal of sanitary napkin.

Detailed Description of the Invention

To put on the pantie, simply wrap the anterior part 1, the left waist 4 and the posterior part 2, the left waist 6 towards the left waist of your body, then tight up the straps 8 and 10 **Or** fasten the Velcro 15 and 16. Also wrapped the right waist 3 and 5 towards the right waist of your body, then tight up the straps 7 and 9 **Or** fasten the Velcro 13 and 14.

To remove the pantie, simply undo all the straps **Or** unfasten all the Velcro.

Preferably the pantie is made of non-woven fabric but it may instead be made from other disposable material. It can be in different color such as white, red, black, pink, blue, etc.
